

Chafing Dish Units

Chafing Dishes are a great way to keep your food warm for hours.

NOTE: Use only the proper canned sterno fuel when operating

Tips for use:

- Place chafing dish in the location where you are serving the food
- Fill large water pan with hot water
- Light both cans of fuel while placed below the chafing dish
- Place food pan inside the water pan
- Maintain water level in pan to prevent burning
- To keep food warmer longer, replace lid after each serving is taken
- Sterno fuel will last 2 – 2 ½ hours
- You may use the food pans to cook in or you can place it in the oven prior to placing in the chafing dish so it will stay hot longer
- Prior to returning, please rinse all food from the inserts or additional charges will apply
